ALERT meeting

Fix bugs about some wfType 2 incorrectly classified as 4

Bug: Waveform type 2 classified as 4

- **Bug:** some wfType 2 (missing trailing edge) were classified as 4 (bad ToT, noise) because their ToT were below 300 ns

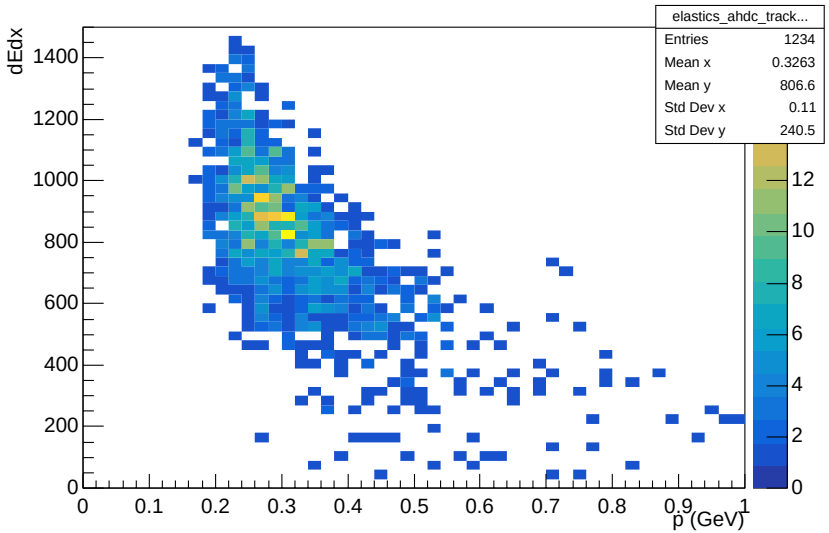

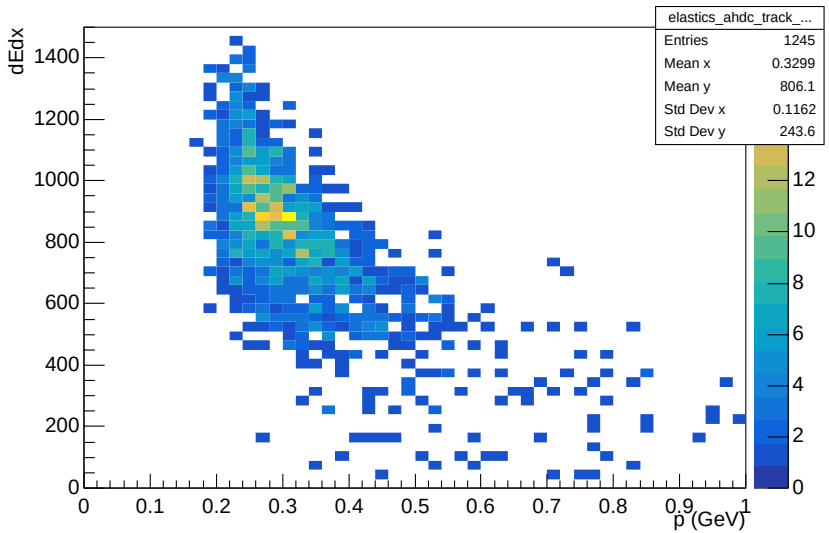

Before

After

Effect on the reconstruction

- I was not expecting a big change, as most of these waveforms seem to be out of time.
- This correction has a small effect on the data
- I earned 1 % of elastic events
- Run 22772, ^{4}He, 2.24 GeV

- I will submit a pull request in the coming days.
